In the Specification:

Kindly amend the specification as indicated.

Page 9, lines 7-10, please amend as follows:

To couple the host 102 to the outside world, typically a gateway ~~108~~ 107

standard in the art is provided and operatively coupled between web server 106 and

backbone network 110. Backbone network 110 may be any packet-based network

standard in the art, such as IP, Frame Relay, or ATM.

Page 23, lines 7-13, please amend as follows:

The process of FIG. 8 continues with the recorded message being normalized in

act 802. As is appreciated by those of ordinary skill in the art, the process of

normalization involves the use of compression and limiting tools which adjust the peak

and average levels of an audio signal in a predetermined manner, thus giving an audio

signal a "studio" quality. In an exemplary non-limiting embodiment of the present

invention, act 802 may be performed using compression/limiter tools standard in the art.

~~Tim: We intend to do more processing than is indicated here.~~
